

Cure Alzheimer's Fund Data Collection (CAFDC)

User Guide (non-technical)

Quick points

- The data downloads are available at https://scripts.mit.edu/*TODO*
- It will take a few days to initially collect all of the information
- However, once the data has been collected, it will always be ready to go

Other notes

- The “On”/“Off” sliders are stored per-browser (i.e. to save these selections you would have to use the same computer and same browser every time)
- You can check the process of the collection by downloading one of the CSV's and checking which years are finished
- No precautions have been taken to guard against false-positives

Questions

Feel free to email us with any issues you run into. It's been great working with the CAF.
